Creighton Cardiac Center Locations and Contact Information
Welcome to Creighton’s Cardiac Center

Since its founding in 1961, The Cardiac Center of Creighton University Medical Center has been dedicated to being a leader in the fields of cardiovascular research, clinical education, early detection and prevention of cardiovascular disease, and pioneering the use of new cardiac procedures and therapies. Over the past 50 years, The Cardiac Center has served more than 185,000 patients and trained more than 124 cardiologists.

Our team of more than 200 cardiologists, nurses, pharmacists, exercise physiologists and health care professionals are specialists in the diagnosis and treatment of cardiovascular disease. We will work closely with your personal physician to provide the highest quality of care and state-of-the-art diagnostic procedures.
