Transitioning Social History

1. Transitioning Social History, we will use the example of a patient whose EHR says Currently Married, however the patient is now divorced.

2. Go to ACI and add correct social history.

3. Right Click on incorrect/old history (Currently Married) and select “Transitioned to” and then the appropriate history. In this example, Marital History - Divorced

4. Item is now displayed as Marital History – Divorced
   a. When you click on the plus sign, details will be displayed with previous history
