Medication Updates

11.2 Changes and Enhancements
Now, one week before your DEA number expires, you will be warned at login. And your administrator will also be notified.
Color-coded Medication Adherence Indicators, in the shape of stars, now display in the Meds component and Clinical Toolbar. The indicators tell you how well a patient is adhering to their prescribed regimen.

For additional support contact: 280-3510 option #1, cmasupport@creighton.edu, or www.creighton.edu/ehr
When you double-click a Medication Adherence Indicator, a summary of Therapeutic Compliance displays. And you can see an average of how many days late a patient picks up their prescription.

The level of compliance is reflected in the color of the MAI:

- If the star is green, compliance is above 75%
- If the star is yellow, compliance is between 75-25%
- If the star is red, compliance is below 25%

For additional support contact: 280-3510 option #1, cmasupport@creighton.edu, or www.creighton.edu/ehr
The Medication Reconcile indicator is now more prominent and will shown when the medication list needs to be reconciled.

For additional support contact: 280-3510 option #1, cmasupport@creighton.edu, or www.creighton.edu/ehr
