Order Updates

11.2 Changes and Enhancements

For additional support contact: 280-3510 option #1, cmasupport@creighton.edu, or www.creighton.edu/ehr
The CareGuide and QuickSets workspaces now have the same options as Rx/Orders. In the screenshot, we see the All view of CareGuides, which displays medications, orders, instructions, follow-ups, and referrals in one view. The first row deals with medication-related options, like Send to Retail, Pharmacy, etc. The second row displays order-related options, like To Be Done, Schedule, and the new To Be Performed drop-down.
When the Rx radio button is selected, only medication-related options display.

When the Orders view is selected, only order-related options display.
