Donation for Humanity

Your expressed interest in participating in the advancement of medical education and research is truly commendable. This is a significant contribution to future generations for which money cannot substitute and which perpetuates an individual’s usefulness to society past their lifetime. Each participant will train no less than four new health professionals and the valuable data gained from each study may assist in advancing the treatment or alleviation of various diseases or physical afflictions. What more fitting memorial can one leave behind than a medical contribution capable of ensuring life and health for thousands, among them perhaps one’s own children and grandchildren?

It is perfectly legal in the State of Nebraska for residents or non-residents to donate themselves to the Anatomical Board of the State of Nebraska. This Board is the agency with legal responsibility for the care and assignment of donors for scientific studies within medical and dental centers in Nebraska. The Board distributes the donors among the educational institutions as needed in order to make optimum use of all donors. Studies of anatomical donors are for educational and research purposes only. No legal findings will be determined and no report will be given upon completion of the study. Generally, most studies are concluded within two years. Upon completion of the study a reasonable attempt will be made to notify the donor’s family. Cremated remains of a donor not claimed within one year following the notification, or the attempted notification, of the donor’s family will be interred or entombed in a common plot owned by the designated university in an Omaha cemetery.

Enclosed are several pages of instructions which provide detailed information on the body donation program. Should you decide to participate in the advancement of medical science and education this way, please complete the enclosed forms and return them for enrollment. A formal will is not required for the donation of one’s self; however the Certificate of Bequeathal must be returned to the Board for acceptance before the enrollment is completed. A wallet card will be mailed to the donor upon acceptance into the program. Donors who have not completed the enrollment will not be accepted. You are strongly advised to consult with your relatives, physician, minister, lawyer or any party responsible for your affairs so they may know your wishes.
Instructions for Donor
(Keep this page for your records)

1. Occasionally a problem may exist which would interfere with the intended use of a donor's gift for education and research. The body may not be accepted if any of the following conditions are present such as: organs or parts removed for transplantation (with the exception of eyes) autopsy, decomposition of the body, severe trauma, drowning, burning, homicide, motor-vehicle accident, death from suicide, contagious disease such as HIV or Hepatitis B or C, morbid obesity, emaciation, body contracture, jaundice, edema or a body mass index less than 19 or greater than 30. The Board also cannot receive donors when storage is full.

2. a. Complete the Certificate of Bequeathal and sign in the presence of two witnesses (not members of your family). In the State of Nebraska it is desirable that agreement and consent of next-of-kin be obtained. Since other states may specify agreement and consent of close relatives, out-of-state donors should be certain to obtain the consent of all the closest next-of-kin on the Certificate of Bequeathal.
   b. Make two copies of the Certificate of Bequeathal.
      - Place one copy with readily available personal papers. (A bank safe deposit box is not recommended.)
      - Provide one copy of the Certificate of Bequeathal to a member of the family, close friend, or attorney who will attend to all arrangements in sending the donor to the Nebraska Anatomical Board. Also, provide them with a copy of the "Instructions to Survivors" page which follows.
      - Return the original Certificate of Bequeathal with requested information to The Nebraska Anatomical Board for enrollment in the program. Regardless of college preference, send the Certificate of Bequeathal to: the Anatomical Board of Nebraska, 986395 Nebraska Medical Center, Omaha, NE 68198-6395.

3. ALTHOUGH NOT ESSENTIAL, the donor may elect to make advance arrangements with a funeral director in the vicinity. The funeral director should be informed of the donor's plans to dedicate themselves to medical science and be instructed as to his responsibilities. (See "Instructions to Survivors.")

The Board has no facilities available for viewing the donor. A mortuary of the family’s choice should be contacted if the donor or their survivors wish to hold a viewing, a visitation and/or a funeral service before the delivery to the Nebraska Anatomical Board. The cost of these services must be assumed by the donor's estate or family members.

4. A brief Medical History is of great value in medical school teaching and research programs; a form for this purpose is enclosed. Return the MEDICAL HISTORY page with the original Certificate of Bequeathal.

5. After the study is completed, the arrangements for the final disposition of the donor’s cremated remains are contained in paragraph 3 of "Instructions to Survivors."

6. A wallet card will be sent to the donor upon the completed enrollment into the Nebraska Anatomical Deeded Body Program. Enrollment is required before a donor can be accepted.

7. Your financial support can also help advance education and research in the health sciences at both the University of Nebraska and Creighton University. Please send your tax deductible contribution to the following address:

   Research and Development Fund, Anatomical Board of the State of Nebraska
   986395 Nebraska Medical Center
   Omaha, NE 68198-6395
Instructions for Survivors
(To be given to a family member, close friend or attorney)

1. The Nebraska Anatomical Board or your local funeral director will expedite the completion of all the necessary papers, such as signing and filing the death certificate. Donors are accepted to age 110 and all donors stay in Nebraska.

2. The donor may not be autopsied. The Nebraska Anatomical Board has no facilities available for viewing the donor; therefore, if no viewing/visitation/funeral arrangements are planned, the donor must be transferred within 12 hours to the Nebraska Anatomical facility. Transportation arrangements can be made through one of the following procedures:
   a) If death occurs in Lincoln or within a 60-mile radius of Omaha and there is no funeral, contact the Nebraska Anatomical Board anytime at (402) 559-6249 or page 402-888-3965.
   b) If there will be a funeral and/or a death occurs beyond a 60 miles radius of Omaha, contact a funeral director of your choice. Be sure to inform the funeral director that you have a donor for the Nebraska Anatomical Board. The funeral director will make arrangements for delivery to the Nebraska Anatomical Facility.

NOTE: Body donation may involve expense for the donor’s estate or survivors whether elected by survivors or required by circumstance. If death occurs within a 60-mile radius of Omaha and the body is delivered to the Nebraska Anatomical Board within 12 hours of the death, there may be little to no expense. However, expenses may occur depending if a mortuary is involved and their particular policies. Beyond the 60-mile radius of Omaha or Lincoln city limits, or if delivery of the donor will require more than 12 hours, additional arrangements must be made with a mortuary. The Nebraska Anatomical Board reimburses mortuaries in Nebraska and Iowa only for mileage at the rate of $1.50 per mile one way, up to 250 miles. It is important that survivors have a clear understanding of expenses involved when they make arrangements with a mortuary.

Families of potential donors are advised that the Nebraska Anatomical Board may not accept all donations. The Board retains the right to refuse donors deemed unsuitable for current needs for education and research.

3. After completion of the study, which generally lasts two years, the human remains will be cremated with dignity and respect. There are several available choices regarding the final disposition of the donor:
   a) If requested to do so, the Nebraska Anatomical Board will return the human cremated remains at the expense of the university in a suitable container to the designated relative, mortuary, or cemetery for final disposition. Any and all costs of final disposition after the cremated remains are received by the designated party must be borne by the estate or survivors of the deceased. Cremated remains of a donor not claimed within one year following the notification, or the attempted notification, of the donor’s family will be interred or entombed in a common plot owned by the designated university in an Omaha cemetery.
   b) If no such request is made, upon completion of the study, the human cremated remains will be interred or entombed by the Nebraska Anatomical Board in a common plot owned by the designated university in an Omaha cemetery.

Certificate of Bequeathal and Cremation Authorization

(Return this page)

I, _______________________________ hereby express my wish to donate my body following my death to the Anatomical Board of the State of Nebraska. I understand that this is a statement of my wish and intention to dedicate myself to medical education and scientific research in the state of Nebraska. In order that this wish may be carried out promptly and effectively after my death, I accept responsibility for obtaining the consent of all relatives or close friends likely to have concerns about the cremation and final disposition of my body. I also authorize the release of my medical records to the Anatomical Board of Nebraska.

I have indicated my preference below for the location of the study, however, I understand the Board may assign my body to the university where needed in order to make optimum use of all donors. Creighton University, the University of Nebraska and the Anatomical Board will make a reasonable effort to respect my preference.

_____ The University of Nebraska  
_____ Creighton University  
_____ No Preference

If it is a burden for family members to sign above and they support your decision for donation and cremation, check the boxes below after you have contacted them.

Are there any other close relatives (spouse, parents, grown children, brothers or sisters) who have not signed?  Yes _____  No _____

Will they respect the donor's wishes and honor the bequeathal and cremation?  Yes _____  No _____

**PLEASE CHOOSE THE FINAL DISPOSITION OF HUMAN CREMATED REMAINS:**

1. **INTERMENT** by the Nebraska Anatomical Board at a cemetery chosen by:
   - Creighton University  or  The University of Nebraska

2. **RETURN** the human cremated remains of the donor to:  FAMILY  MORTUARY  CEMETERY

Please indicate address: __________________________________________________________

___________________________________________________________________________

**Notification of Memorial Service:** Each year the students from each medical center hold a memorial service to honor donors who have contributed to their education. Families who want to be invited to the memorial service after the study has been completed should indicate below.

Notify family member of memorial service after study is completed?  Yes _____  No _____

Name of person to notify:

___________________________________________________________________________

**Next of kin or person in charge of donor's affairs:**
