Recently Diagnosed With Obstructive Sleep Apnea?

Creighton University is seeking volunteers for a research study looking at how the use of CPAP, a treatment for sleep apnea, influences the way aspirin affects platelets in blood.

You may be able to participate if:

* You are a man or woman 19 years of age or older
* It was determined from a diagnostic sleep study that you have moderate-to-severe OSA
* You are starting CPAP and will be using it for at least 3 months

Stipends for time and travel are available.
