## About Creighton Medical Associates

Creighton Medical Associates (CMA) is a network of physicians and support staff who are part of Creighton University, one of 28 Jesuit colleges and universities in the nation. Every day, nearly 200 CMA physicians provide high-quality primary and specialty care to patients at Creighton University Medical Center and in offices located throughout the Omaha metropolitan area. Our mission is to provide excellent, cost-effective care to our clients and to support the academic mission of Creighton University School of Medicine and Creighton University Medical Center.

## Creighton Neurology

Creighton Neurology is headed by Sanjay P. Singh, M.D., an internationally known neurologist and epileptologist. His team includes highly-trained physicians, scientists, technicians and nurses dedicated to providing comprehensive, compassionate and cost-effective diagnosis and treatment of diseases and disorders of the brain, spinal cord, nerves and muscles.

The neurology team works closely with your primary care physician to treat such conditions as epilepsy, stroke, Parkinson's disease, headaches, neuromuscular disorders, spinal cord disorders and all other neurological disorders. These specialty clinics provide world-class care to our patients.

### Clinical Services

- **Electroencephalogram (EEG) testing** to diagnose disorders of the brain.
- **Video EEG monitoring** to establish the type of seizures and determine the best course of treatment for epilepsy and seizures.
- **Electromyography/nerve conduction testing** to diagnose disorders of the peripheral nerves and muscles as well as evaluate patients with back and neck pain.
- **Vagal nerve stimulation** to treat intractable epilepsy not responding to medications. This treatment is approved by the U.S. Food and Drug Administration.
- **Botox or botulinum toxin therapy** to combat a number of neurological disorders, including migraine headaches and spasticity due to stroke, multiple sclerosis and other brain and spinal cord injuries.
