School of Medicine

Department of Medical Microbiology and Immunology

Center for Research in Anti-infectives and Biotechnology

Presents

ANTIMICROBIAL AGENTS AND CHEMOTHERAPY MINICOURSE

May 7-9, 2019

Criss Health Sciences Complex

AUDIENCE:

This is an introductory course on antibacterial chemotherapy and resistance. It is designed for individuals with limited experience who may work in a clinical environment or in the diagnostic or pharmaceutical industries, but can also be beneficial for experienced individuals seeking a refresher course.

It begins with basic concepts of antibacterial therapy, pharmacodynamics, and susceptibility testing, and moves into more advanced concepts such as detailed descriptions of mechanisms of antibacterial activity of some drugs, mainly cell-wall active drugs, and of the development of resistance to them. Special emphasis is given to the challenge of accurate detection of resistance with lectures being complemented by an interactive phenotypic and molecular laboratory session.

TUITION: \$800.00

Please pay in full by April 15, 2019 (spaces are limited)

Registration is not refundable, but may be transferred to another individual within the company. For more information, please contact Stacey Morrow (402) 280-3180 or StaceyMorrow@creighton.edu.

*Payment must be in the form of sponsoring agent or company check.
No credit cards can be accepted.*

Please return this portion along with the registration fee of \$800.00

**ANTIMICROBIAL AGENTS AND CHEMOTHERAPY
SCHEDULE, MAY 7-9, 2019
Criss Health Sciences Complex**

Date	Day	Time	Topic
May 7	Tuesday	8:30-11:30 a.m.	Introductions Drivers of Antibiotic Resistance Porin and Efflux mediated resistance Pharmacodynamics of Antibacterial Agents Cell Wall Active Agents
		11:30 a.m.-12:30 p.m.	LUNCH
		12:30-5:00 p.m.	Protein Synthesis Inhibitors Fluoroquinolones Mobile Genetic Elements Antimicrobial Susceptibility Testing and Antibigrams MRSA and <i>C. difficile</i> Issues
May 8	Wednesday	8:30-11:30 a.m.	β -lactamases—What you need to know Regulation of CTX-M and KPC β -lactamases
		11:30-12:30	LUNCH
		12:30– 5:00 p.m.	AmpC β -lactamases <i>Pseudomonas aeruginosa</i> Molecular Testing—Current and Future Applications
May 9	Thursday	8:30-12:00	Laboratory Session

Course Director: Nancy D. Hanson, Ph.D.

Faculty: Nancy D. Hanson, Ph.D.
Stephen J. Cavalieri, Ph.D.
Stacey S. Morrow, MS, MT(ASCP)
